Description: "...a solid refutation for the claim...that mathematics is one subject which cannot be taught from a distinctively Biblical perspective"

Product Description

This book revolutionizes the prevailing understanding and teaching of math. The addition of this book is a must for all upper-level Christian school curricula and for college students and adults interested in math or related fields of science and religion. It will serve as a solid refutation for the claim, often made in court, that mathematics is one subject, which cannot be taught from a distinctively Biblical perspective.
